

Farmland safari

Habitats:	Wet pasture, agricultural fields, rivers, and forest fragments.
Duration:	Half day, returning to the lodge for lunch
Departure:	Early morning
What to take:	Binoculars, camera, sunscreen, hat, water, sturdy walking boots, and a waterproof jacket. A telescope is also useful but not essential.
Useful info:	Transport is via pickup retrofitted with basic wooden benches in the back. Limited seating is available in the cabin participants may need to be able to climb in and out of the truck over the tailgate via a small step.. This excursion takes in a variety of habitats found along the dirt roads outside REGUA. This is a hot environment with very little shelter from the sun, therefore we strongly recommend an early start and plenty of sunscreen, water and a hat.

This is an easy half day excursion along the dirt roads around REGUA to explore the agricultural land, wet pasture and rivers where a large number of bird species typically associated with open country can be found. With the reforested areas at REGUA now well established, many of these species are now quite difficult to see on the reserve, with forest species moving in. This enjoyable short tour is a great way to take in the mountain scenery and depending on the precise route there is an option to visit to a local shop.

Target species:

Whistling Heron	Fork-tailed Flycatcher (August – December)
Savanna Hawk	Bran-coloured Flycatcher
Harris's Hawk	Streamer-tailed Tyrant
Great Black Hawk	White-rumped Monjita
